Mx Player Pro

By now a lot of people have known about MX Player APK. Unlike other video player app, MX Player comes with incredible features. If you want to download MX Player APK then it is available on Google Play Store. But, alongside you will get a bunch of spammy video player apps. So, here we are to provide a direct link to the latest official version of MX Player APK here in this post. About MX Player APK Before we proceed to the download, let's talk about MX Player first. MX Player is now considered the best media player in the video player market. For a free app, it offers features that exceed even the premium apps out there. It can play various kinds of videos irrespective of the format of videos and subtitles as well. If you are too busy, you can even play music in the background while you work. There is more to MX Player than meets the eye. Features of MX Player APK The following are the impeccable features I found on MX Player. MX Player supports windows 8.1 and 10 devices, download MX Player for PC or/and laptop from here. Gesture Control MX Player supports a variety of gestures that are easy-to-use, using which you can avoid multiple steps for certain functions. MX Player is the first Android media player that comes with a pinch to zoom in and zoom out. And, you can skip forward or go backward by swiping your finger right or left over the playback screen. It also has another feature (you should turn it on), which helps you play or pause the playback with a double-tap. Kids Lock Kids lock is the most useful feature of MX Player. When you think there is a chance to disturb the video playback due to accidental touches, you can turn it on. All you have to do is tapping on the lock icon given in the left-bottom corner. Once you do that, the playback will not be stopped until you unlock the screen. Universal Subtitle Support MX Player supports almost all subtitle formats. All you have to do is place the subtitle file in the same format where the video resides or load it from the app interface. MX Player also provides you with a facility to search for the appropriate subtitles. Moreover, you can skip, go back, reposition, and stylize them as well. Network Streaming Along with the local media playback, MX Player supports network streaming too. You need the video URL for that. Open the app, and hit the three-dots on the top-right corner. You will get an option named Network streaming. Hitting on it brings up a text field. You should paste the video URL into that field to start network streaming. Resume Playback Not every mobile video player has this function. But you will find this to have at most usefulness. Suppose you were watching a movie and you quit the app. But when you come back, you have to skip all the initial scenes you have seen. MX Player makes your job easier. It will ask you whether you want to resume or start over. Background Audio Playback What if you don't want to watch the video but love hearing the audio? Well, you need to open a video to audio converter. No, MX Player has a background audio playback feature that makes it work exactly like a music player. You can hear the audio even after you hit the back button. If you notice no audio issue in the MX player, please download the MX player AIO Zip codec from here. Download and install these codec files on MX player to fix no audio issue easily. Play Store errors make application installations a mammoth task. We have to find the appropriate APK file first. If you don't vigilantly make the selection here, you may end up having malware on your phone.
